IRT7311 Assignment roadmap

Note: Student must follow the assignment roadmap/checklist to obtain high mark percentage.

Question 1.1	Expectations/requirements	Hint
Identify the paradigm for each article. You will need to motivate each choice of paradigm using examples from each of the articles as well as a critical discussion of each of the paradigms chosen.	• The correct paradigm has been identified for each article. • Motivation for the selection with evidence from the article is provided. • Sufficiently clear critical discussion of each paradigm. • Evidence of further research beyond textbook.	• Have a minimum of 3 academic sources that discuss similar topic to find the paradigms. • Use the key words to find the sources on google scholar or any other academically accessible library. • Look at similarities and differences between the 3 academic source and the article you are critiquing. • Minimum of 1 page will be accepted.
Question 1.2	Expectations/requirements	Hint
Identify and explain the research methodology for each article. You will need to motivate using evidence from each article, as well as theory from various sources.	• The correct research methodology has been identified for each article. • Motivation for the selection with evidence from the article is provided. • Sufficiently clear critical discussion of each methodology with links to the paradigm selected in. • Evidence of further research beyond textbook.	• Have a minimum of 3 academic sources that discuss similar topic to find the research methodology. • Use the key words to find the sources on google scholar or any other academically accessible library. • Look at similarities and differences between the 3 academic source and the article you are critiquing. • Minimum of 1 page will be accepted.
Question 1.3	Expectations/requirements	Hint
What is the key research problem that the researchers seek to address in each of the articles? In your answer, provide a concise description of the research problem and evaluate it against the theory you have covered regarding research problems.	• The research problem has been identified for each article. • Motivation for the selection with evidence from all of the articles is provided. • Theoretical understanding of what a research problem is evident in the answer.	• Look at what each article is trying to solve. i.e. • Explain how they are going about trying to solve it. • Discuss how other academic scholars went about solving the similar problem. • 1 Page minimum
Question 1.4	Expectations/requirements	Hint
For each of the three articles, identify the research questions posed by the researchers and explain the focus of each question in relation to the study.	• Explain each research question and demonstrates a strong understanding of what the researchers aim to investigate. • Accurately and clearly identifies the research questions for all three articles, including implicit questions where not explicitly stated.	• Look into phrases that sound like a questions • Write the exact questions and discuss your understanding about them. • What are the questions required answering to solve the research problem • 1 Page minimum
Question 1.5	Expectations/requirements	Hint

Discuss the possible sampling method used to define the sample for each article. Using your theory, include one advantage for the sampling method used in each study.	- The possible sampling methods for each research article have been discussed and correctly linked to the methodology. - Motivation for the specific sampling method selected has been argued logically	- Look into how each methodology uses sampling technique. - Use internet sources to get understanding and then search google scholar for relevant articles. 1 Page minimum
Question 1.6	Expectations/requirements	Hint
Using examples from each article, identify the data collection methods used in each study. Motivate your answer with examples from each article as well as theory from various sources.	- For each research article, the specific data collection method has been identified. Motivation for the selection with evidence from the article is provided. Sufficiently clear critical discussion of each method. - Sufficiently clear critical discussion of each method.	- Mention any method of technique that has to do with collecting data. 1 Page minimum
Question 1.7	Expectations/requirements	Hint
Discuss the most significant key findings derived from the analysis of each of the research articles. Support your analysis with evidence from the articles.	- The key findings for all three of the research articles have been correctly identified and discussed. - The implications and insights provided are accurate.	- What was discovered by the author in each article. - Who else discovered the same or different outcome according to your sources. - Did what they discovered solved the problem or created more issues. 1 Page minimum
Question 1.8	Expectations/requirements	
Critically discuss the ethical issues the researchers can be expected to have considered before, during, and after the research process.	Sufficiently clear critical discussion of the role of ethics in research demonstrating an understanding of the issues that should have been considered by the authors at all stages of the research.	- Use google scholar to find articles on research ethics. 1 Page minimum
Question 1.9	Expectations/requirements	Hint
Based on your analysis of the articles, propose potential areas or topics for further research by highlighting any gaps, limitations, or unexplored aspects that you believe warrant future investigation. Motivate your suggestions with references to the articles themselves.	- Demonstrates a deep understanding of the articles and their content. - Identifies significant gaps, limitations, or unexplored aspects in the research that require further investigation. - Provides well-justified and specific suggestions for future research, supported with clear references to the articles. - Response is exceptionally well structured and organised.	- On each articles find areas where the research can be improved or changed. - Look into areas that the study can also focus on. 1 Page minimum

Assignment instructions

- Include table of content
- Font size: 11
- Font type: Times New Roman
- 1.5 Line spacing
- Content must be in full justify
- Submission must be in pdf format
- Add page numbers
- In-text citation and referencing in Harvard style. Use Zotero software.
- **Note:** The assignment will be subjected to plagiarism and AI content review.
